

Where your data goes

For clients and ethics counsel. Every place your data touches, how long it stays there, and who can see it.

One prompt, start to finish

1 You send a prompt Your browser Encrypted in transit with TLS 1.3, through Cloudflare's network.	2 Saved to your history Our server, Falkenstein, Germany Encrypted at rest. Kept until you delete it.	3 The model answers ZDR serverless inference provider Processed in memory. Never written to storage, never used for training.	4 The answer comes back Your browser Saved only in your history, next to the prompt.
--	--	--	---

Zero data retention at the model.

Retention and access

What	Where	How long	Who can see it
Prompts and answers in transit	Between your browser and our server, through Cloudflare	Only while sending	Cloudflare, briefly, to route it and block attacks. Not logged.
Model processing	ZDR serverless inference provider H200s and serverless inference providers, USA	In memory, during the request	Nobody. Not stored, not used for training.
Chat history and uploaded files	Our server, Germany	Until you delete them	You. There is no admin chat viewer.
Server logs	Our server, Germany	14 days	Us, for security. They contain no chat content.
Backups	Encrypted storage, Germany	30 days, then gone	Nobody without the backup key, which is kept off the server.

Our controls

- Full-disk encryption on every server, unlocked by hand at boot.
- Backups encrypted before they leave the server.
- Invite-only accounts, with two-factor sign-in available.
- No admin chat viewer. Every admin sign-in is logged.
- Your data goes only to the providers named on this sheet.
- No analytics or trackers in the app.

Providers and model

Hetzner, Germany. App, history and backups. ISO 27001 data centers.

ZDR inference on H200s, USA. Runs the model. SOC 2 Type II. Zero data retention.

Cloudflare. Network in front of the site. Decrypts traffic briefly; does not log it.

Tavily, Google, Bing, Brave, Startpage. Web searches the assistant makes.

Mailgun. Sends sign-in and password emails. Gets your email address only.

Open-weight model. MIT license, run on our own inference setup. DeepSeek never receives your prompts.

Deleting your data

Delete a chat and it leaves the server at once, and the backups within 30 days. Uploaded files stay in your file list until you delete them there. At the end of the pilot you can export your history or have it deleted.

What this sheet is not

No tool settles your professional obligations on its own. ABA Formal Opinion 512 expects lawyers to understand how an AI tool handles client data; this sheet gives you the facts for that assessment.
